1.° _____

Figure 1 is a line graph showing the relationship between the angle of incidence (θ_i) and the angle of refraction (θ_r) for light passing from air to water. The x-axis is labeled θ_i and ranges from 0 to 90 degrees. The y-axis is labeled θ_r and ranges from 0 to 50 degrees. A curve starts at (0,0) and increases, passing through approximately (30, 18) and (45, 28).

Figure 1 is a line graph showing the relationship between the angle of incidence (θ_i) and the angle of refraction (θ_r) for light passing from air to water. INTERPRETACIÓN DEL PREÁMBULO DEL TELEGRAMA

1.º Palabra donada a la que se da respuesta

2.º Lugar / Remitente

3.º N.º de palabras del telegrama

4.º Fecha de depósito

5.º Hora

Tasa mínima: 24 pensientas

Cada palabra: 1,50 pensientas

En el número de palabras están comprendidas las que corresponden al destino, texto, saludos y firma del telegrama

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There is no handwriting or other markings on the paper.
